

As part of our ongoing commitment to ensuring students' safety and well-being, we're proud to announce that we are in partnership with Linewize by Family Zone.

Linewize is New Zealand's leading provider of cyber safety technology. The Linewize technology will allow our school to better maintain our duty of care during school hours by ensuring the students are safe online no matter what network they are connected to.

This supports our legal responsibility to keep students safe and will allow us to ensure that students are entirely focused on their learning whilst at school.

WHAT'S BEEN DONE?

Filtering software has been installed on our all devices that connect to our school network.

WHAT DOES THIS MEAN FOR STUDENTS USING THEIR SCHOOL ACCOUNT?

Our school will monitor and filter content whenever students are logged into the Chrome browser with their school account. This may be on a Chromebook or when using Chrome on Mac/ Windows laptops and desktops regardless of the network.

WHAT HAPPENS OUTSIDE OF SCHOOL?

Our school's monitoring and filtering only applies outside of school when students are using their school account.

WHAT DOES THIS MEAN FOR STUDENTS USING BYO DEVICES?

Your child will be required to self-install the software onto their device. Students will be notified in advance of what this means for them and when it will be occurring.

Having the software installed and active on your child's device during school hours will be a compulsory part of the schools' IT policy. This will be monitored and enforced and appropriate action will be taken with students found to be in violation of school policy.

By default, the Family Zone App installed on BYO devices will only be active during school hours.
