Brain Injury Incidence & Service Access New Zealand in the Community

Head Injury Research

Researchers from Auckland University of Technology, Waikato and Auckland Universities, are carrying out a study looking at the number of adults and children having head injuries over a one-year period in the Hamilton and Waikato areas. The research team are also interested in learning more about people's experiences of health care services following a head injury. Study findings will help with planning services in the future. If you or someone you know has a head injury between **01 May 2021 - 30 April 2022**, please contact the Study Manager to find out more ph: 07 838 4257 or 0508 2BIONIC, or email bionic2@aut.ac.nz.
